- Event Coordinator- TechXtreme - 2024
- Core Team Member - TechXtreme and Jazba 2024
- Core Team Member - Orientation/Graduation 2024
- Head of Department (CE/IT) - TechXtreme 2025
- Zonal and State Level Achievements in Quiz and Skit
- Various School level achievements

PROFILE

Full-stack developer with 2+ years of experience building scalable, user-centric web and mobile applications. My work blends modern JavaScript frameworks like React and Node.js with cloud-ready architectures to deliver performance, reliability, and clean execution.

I enjoy understanding problems deeply — breaking them down, optimizing edge cases, and building solutions that are both elegant and practical. Whether it's crafting intuitive UI flows or shaping efficient backend systems, I focus on impact and long-term maintainability.

Outside of development, I stay curious: exploring emerging technologies, contributing to open-source, and engaging with the developer community to grow and help others grow.

PROJECTS

ICETAC - Completed
A comprehensive web application for the 1st International Conference on Emerging Trends in Artificial Intelligence & Cyber Security, emonstrating expertise in modem web development and backend integration.

Operation Codebreaker - Completed
A high-intensity competitive coding event platform themed around preventing a nuclear missile launch, developed for TechXtreme'25 at Gandhinagar University.

Mystic6174 - Completed
A cybersecurity-focused Capture The Flag (CTF) game designed to test participants' hacking instincts and puzzle-solving skills for TechXtreme'24 at Gandhinagar University.

Bolibazaar - Ongoing
A comprehensive dual-platform marketplace combining traditional e-commerce shopping with live auction functionality.

Sunshine - Ongoing
A full-stack e-commerce platform built with modern technologies, featuring both web application and a separately developed mobile app.

EDUCATION

B.Tech - Computer Science Engineering
G.I.T. | Gandhinagar University
